

Success at CA Technologies

Mason Maeshiro

Graduate of the Associate Software Engineering Program

Since joining the ASE program, Mason has been able to gain experience working with Agile programming in an Agile sprint simulation, giving him hands on experience in the field.

Mason currently focuses on the browser-side which involves JavaScript programming, and ensuring consistency across supported browsers. As a team member, he also assists in creating new features, conducting manual testing, debugging, and documentation.

Throughout his time as an ASE, Mason has created unit tests and automation test beds to assist with debugging, and also has contributed code to his teams' product. He has also helped discover and resolve several defects, and became the lead on extending a product to support Edge and Mobile Safari 9 browsers.

“The ASE program is an excellent opportunity to try out various teams, work with different products, and learn from the experiences of your fellow ASEs to discover what truly interests you. Find something you enjoy doing; after all, you spend most of your waking hours at work. Why not make the best of it?”

Current Position:
Associate Software Engineer, APM

Office Location:
Santa Clara, California

Background:
Mason graduated from Santa Clara University in May of 2015 with a Masters Degree in Computer Science and Engineering
